## YOUNG PROXEO TWIST

wireless handpiece with foot pedal

The Young Proxeo Twist Cordless enables rotary polishing without any restrictions – in more ways than one. **Complete cordless freedom of movement** ensures maximum comfort during use. The handpiece has a cordless foot control and is compatible with two different cup systems: Young polishing cups with screw connection or hygienic disposable contra-angles.

**Recommended rotation speeds**  
1.250 - 2.500 rpm

**Versatile**  
easy to move from room to room

 **Cordless and lightweight**

**Modular**  
Choose from various cup systems

**Well balanced**  
Reduces hand fatigue

**Reliable**  
Li-ion battery lasts all day

## The Benefits:

**Ideal rotation speeds** protect the tooth from overheating and prevents abrasion. It also ensures a comfortable treatment and reduces polishing paste splatter.

The **wireless foot control** allows maximum freedom of movement and quick position changes around the patient. Easy to operate thanks to WiFi connection. The speed can be adjusted continuously from 0 to 2,500 rpm.

Ergonomic treatments are made possible by **freedom of movement** working. With cordless freedom of movement the treatment position can be adjusted at any time and ensures maximum comfort during use. The cordless handpiece also enables a back-friendly working posture. **Also suitable for left-handed users.**
